

How-To

How To Generate a Heritage Data Management System (HDMS) Species List in HabiMap™ Arizona

STEPS

1. **URL:** Direct browser to: <http://habimap.org/> (Fig 1, Step 1) → Click the image OR the link “HabiMap™ Arizona” → Read and agree to the Disclaimer.
2. **OPEN THE HDMS QUERY TOOL:** Click on the “HDMS Query” button in the “Tools” toolbar at the top of the screen.
3. **GENERATE THE TABLE:** The point query tool is active when the HDMS Query Tool is first opened. To generate a HDMS list, zoom to an area of interest and click on the map. This will generate a list of HDMS species that occur within the selected quad.
4. **SAVE THE QUERY LIST:** Once the table is generated, it can be saved as a .csv or a text file. Click ‘Export’ at the bottom of the table and save it in a format you prefer.
